

DARIUS STROMAN

Frisco, TX | (972) 294-9176 | dariusstroman@gmail.com | [linkedin.com/in/dariusstroman](https://www.linkedin.com/in/dariusstroman)

PROFESSIONAL SUMMARY

Cloud-focused software engineer with 6+ years across infrastructure, automation, and enterprise IT, backed by an M.S. in Software Engineering and AWS Certified Cloud Practitioner credential. Hands-on experience designing Python and n8n automation workflows, managing AWS services (EC2, S3, IAM, VPC, CloudWatch), and delivering Tier 2 support in Agile/Scrum environments. Builds and maintains cloud-native solutions with a strong foundation in scripting, incident response, and cross-functional collaboration. Eager to contribute to Toyota Financial Services engineering teams focused on cloud, automation, and enterprise platforms.

PROFESSIONAL EXPERIENCE

Data Center Technician II | CentersquareDC | Fort Worth, TX May 2025 – Present

- Automated fault-isolation workflows using Python scripts, reducing mean time to resolution on production incidents in a 24/7 colocation environment.
- Executed incident response and change management processes; maintained audit-ready documentation aligned to enterprise compliance standards.
- Managed server hardware via iLO, iDRAC, and IPMI, sustaining 99.9%+ uptime across high-density multi-tenant rack deployments.
- Deployed and tested fiber and copper cabling infrastructure supporting high-speed enterprise connectivity across cloud-connected systems.

IT Service Desk Analyst | Altice USA | Plano, TX Nov 2023 – Nov 2024

- Resolved 300+ weekly tickets in ServiceNow across Windows and macOS environments, maintaining SLA adherence within an Agile/Scrum team.
- Managed user provisioning and access control via Active Directory, enforcing least-privilege standards across the enterprise.
- Contributed to team sprint planning and retrospectives, applying Agile best practices to improve ticket-queue throughput by 15%.

Security Systems Technician | Safe Haven Security | Texas Nov 2024 – May 2025

- Configured IP-based surveillance and IoT automation systems, troubleshooting network connectivity for edge devices and control panels.
- Documented all deployments to client specifications, maintaining compliance with low-voltage and safety cabling standards.

Data Cable / Center Technician | The Brass Effect | Frisco, TX May 2018 – Oct 2023

- Installed and terminated Cat5e/Cat6 structured cabling across commercial sites supporting enterprise network infrastructure.
- Configured patch panels, switches, and server racks; applied structured diagnostic processes to resolve connectivity issues.

TECHNICAL SKILLS & CERTIFICATIONS

Cloud & Infrastructure: AWS (EC2, S3, IAM, VPC, CloudWatch), Azure, Linux, Windows Server, Docker/Kubernetes (basic), iLO/iDRAC/IPMI

Programming & Automation: Python, Bash, JavaScript, SQL, n8n, Make.com, GitHub/GitLab, ServiceNow, Supabase

Networking & Systems: TCP/IP, DNS, Security Groups, Active Directory, Agile/Scrum

Certifications: AWS Certified Cloud Practitioner, CompTIA Data+

EDUCATION

M.S. Software Engineering | Western Governors University 2025

B.S. Data Analytics | Western Governors University 2024
